You must have thought about career options after engineering at some point or other while you are pursuing or soon after completion. You are not judged by the choice you opted but what you are doing to earn after you complete your education. The society concerns about the job and salary you earn after apart from intellectual property.

Engineering is among the most generally desired careers for the present generation.

An engineering degree has evolved dramatically and has turned out to be every youngster's aspiration, amid the tough competition today and promising a least resistant path to a well-paid job. However, an increasing trend among the engineering aspirants has also been noticed to think outside the box and opt for careers that do not have much connection with engineering.

Before getting started, let's keep these three things in mind:

- Every individual is not born to graduate, pursue Master's degree and get a well-paid job. You can be the change you want to view in the world and however people like Gandhi and APJ Abdul Kalam were never master degree holders, still we know them and not bothered about their salaries.
- You don't need to leave a straightforward option since you think it is mediocre. Do not follow other but follow what is right for you.
- Do not worry if a million others like you are preparing for the entrance exam. If you believe you are good enough to crack the exam, nothing can stop you.

How good does it feel to own a job in hand even before you pass out. You will end up with an offer letter to warm up your pocket soon after you graduate if your college owns a good initiative and rapport for campus placement drive. You can settle with placement offer if you have no plans to study further or soon after Engineering.

Go For An M.Tech Degree

Specialization always adds a preference to the quality. Pursuing higher education in the desired subject is the top recommendation if engineering is your passion. You would be able to contribute better and serve a purpose in your industry with focused knowledge and enhance your career in future. One of the standard criteria on a

national level is to clear GATE exam and apply for IIT, NIT or other universities based on your scores. Mtech streams can be categorized under Academics, Research, Development and others.

The students who prefer MBA over Mtech can go for CAT exam to acquire a seat in established universities. Byju's – the learning app provides online tutorials for CAT preparation as a gateway for the students interested in MBA. The Edtech company also offers tablets for courses that include video classes, [educational apps](#) along with one to one mentoring for any clarification. The aspirant can take mock tests and improve his performance through proper guidance by personal mentors.

The site also provides NCERT solutions and [CBSE syllabus](#) for class 6 to 12 students to help them ace in their final examinations.

Entrepreneurship

Entrepreneurship is challenging option after B.tech but scintillating as well, since, who doesn't want to be his own boss. It is challenging because due to minimal business experience, it gets very challenging to stand still in cutthroat competition from strong, established and experienced organizations and business setups. But apart from acting as a barrier to your thoughts, if there is a belief and you have obtained some actual results in your studying years, then you should definitely implement your entrepreneurial skills. After all well known businesses also started from 0.

Who doesn't like to be tasty and cheer up their mood by delicious food? If your taste buds are good enough to make you a food critic, you can be a well-paid professional where no formal qualification is required. Being an unconventional career option after engineering, it can be appealing to someone out there who have their unique skills in developing a variety of flavors. However, you might need to quit alcohol and smoking which are the prerequisites for maintaining sensitive taste buds.

Creative Writing

What would be more influencing than creative writing that can describe and change the whole world through innovative ideas that arise by writing? In the present age where everything is digitized, writers have flourished in the present age like never

before. The smallest of variation in blogging can make you an overnight celebrity. Moreover, by virtue of better writers and their mass appeal, the present generation novelists are also in search of greater acceptance among interested students. If you carry a right attitude towards writing and willing to reach beyond towards perfection, a career as a writer is waiting for you.

These were the few among various other options you can opt soon after engineering. Who knows that you may be the next unconventional career story to be featured here.

Amit Paliwal

Amit Paliwal believes in the impact of writing along with developing articles, blogs and notifications. According to him, every word is an ornament of every content and language is the most powerful means of knowledge that can only be achieved through effective writing. Apart from content writing, music, painting and sports are his field of interest. ***Email- amit.paliwal@byjus.com***
